HCS-2012 APPENDIX D TO §1910.1200

# 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Product identifier Product Name Chemical Name	Wellpren CPE IM898M CHLORINATED POLYETHYLENE(CPE)
Other means of identification Cas	No information available
Recommended use of the chem	ical and restrictions on use
Recommended Use	Used in the plastics industry as an additive to modify a range of properties. Also used in rubber industry.
Uses advised against	No information available
Details of the supplier of the sar Supplier Address Postal Code Phone FAX E-mail	Sundow Polymers Co.,Ltd. FL.8, Riverdals Building, No.350, Dongfeng Street, Weifang, Shandong, China - +(86) 536 8057068 +(86) 536 8057018 info@sundow.com
Importer Address Postal Code Phone FAX E-mail	Harwick Standard Distribution Corporation

## Emergency telephone number

+86 5368057068 (Only office hours available.)

## 2. HAZARDS IDENTIFICATION

## GHS Classification

Not a dangerous substance or mixture according to the Globally Harmonized System (GHS)

## Label elements

Symbols/Pictograms	None
Signal word	None
Hazard Statements	Not classified
Precautionary Statements	
Prevention	None
Response	None
Storage	None
Disposal	None

## Hazards not otherwise classified (HNOC)

No information available

#### Unknown acute toxicity

0% of the mixture consists of ingredient(s) of unknown toxicity

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature	<i>A</i> ixture	
Chemical Name	CAS No	Weight-%
Chlorinated polyethylene	64754-90-1	>90
Talc	14807-96-6	<7
Calcium stearate	1592-23-0	0 - 3
Calcium carbonate	471-34-1	0 - 5

## 4. FIRST AID MEASURES

#### Description of first aid measures

General advice	In all cases of doubt, or when symptoms persist, seek medical attention.
Inhalation	Move victim to fresh air. Seek medical advice immediately if adverse symptoms such as chest tightness, respiratory irritation, coughing or breathing difficulties develop. If breathing has stopped apply artificial respiration.
Skin Contact	Remove contaminated clothing and footwear. Wash affected areas with soap and plenty of water. Decontaminate footwear and wash clothing before reuse. Seek medical advice if skin irritation develops.
Eye contact	If the dust go into eye, can rinse eyes with water for at least 5 minutes.
Ingestion	If swallowed do NOT induce vomiting. Rinse mouth thoroughly with water. Seek medical advice.

#### Most important symptoms and effects, both acute and delayed

It may cause minor irritation with eye or skin contact due to mechanical effects, but is not absorbed through the skin. Dust may cause irritation to the upper respiratory tract.

#### Indication of any immediate medical attention and special treatment needed

Treat symptomatically and supportively. Treatment may vary with condition of victim and specifics of incident.

## **5. FIRE-FIGHTING MEASURES**

### Extinguishing media

Suitable extinguishing media Use water, foam, dry chemical or carbon MEDIA dioxide to extinguish fire. Unsuitable extinguishing media No information available.

#### Specific hazards arising from the chemical

Oxides of carbon, hydrogen chloride, organic acids, aldehydes and alcohols. Dust of this material is capable of producing explosive mixtures with air.

#### Protective equipment and precautions for firefighters

Do not stay in dangerous zone without self-contained breathing apparatus. In order to avoid contact with skin, keep a safety distance and wear suitable protective clothing. Prevent fire-fighting water from entering surface water or groundwater.

## 6. ACCIDENTAL RELEASE MEASURES

## Personal precautions, protective equipment and emergency procedures

Dust of this material is capable of producing explosive mixtures with air.

Wearing full PPE isolate hazard area, increase ventilation and restrict access. Remove all ignition sources. Take steps to reduce dust generation as this material is capable of producing explosive mixtures with air.

### Methods and material for containment and cleaning up

Sweeping or vacuuming techniques.

Small Spills: Wear suitable respiratory protection. Use a dry cleaning procedure and avoid generating dust. Sweep or vacuum up the product and place in sealable containers. Label the containers to ensure appropriate disposal. Large spills: Wearing the personal protective equipment listed in Section 8 use a dry clean-up procedure. Vacuuming is the preferred method. Alternatively, sweep up product with a broom. Take steps to minimise generation of airborne dust. Place contaminated material in suitably labelled, containers. Prevent substance from entering drains, waterways or groundwater.

## 7. HANDLING AND STORAGE

#### Precautions for safe handling

Practice sound industrial hygiene. Wash hands before work breaks and at the end of a shift. When handling minimise contact with product by always wearing the recommended personal protection equipment (See Section 8). Avoid dust generation - material is capable of forming explosive mixtures with air. Avoid breathing airborne dust. Avoid contact with, or inhaling vapour emanating from molten material.

## Conditions for safe storage, including any incompatibilities

Store in a cool, well ventilated place. Avoid exposure to direct sunlight or heat. Store away from incompatible materials (see Section 10). Protect against physical damage.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### **Control parameters**

Calcium carbonate (CAS #: 471-34-1)	-	-	10 mg/m <sup>3</sup>	-	-

### Appropriate engineering controls

Use only in well ventilated areas or use good general mechanical extraction ventilation to maintain air concentrations below exposure standards.

## Individual protection measures, such as personal protective equipment

Respiratory protection	Use a dust respirator.
Hand Protection	Wear protective gloves.
Eye/face protection	Safety glasses should be sufficient for most operations; however, for dusty operations wear chemical goggles. If vapor exposure causes eye discomfort, use a fullface respirator.
Skin and body protection	No precautions other than clean body covering clothing should be needed.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

formation on bacio prigerear ana enemiear pre	
Appearance	Powder
Color	White
Odor	Odorless
Odor Threshold	Not determined
рН	Not determined
Melting point/freezing point	Not determined
Boiling point / boiling range	Not determined
Flash point	Not applicable
Evaporation rate	Not determined
Flammability (solid, gas)	Not determined
Flammability Limit in Air	Not determined
Vapor Pressure	Not applicable
Vapor density	Not determined
Density	1.1-1.3 g/cm3
Relative density	Not determined
Bulk density	0.45-0.6 g/cm3
Specific gravity	Not determined
Water solubility	Insoluble at 20 °C
Partition coefficient (LogPow)	Not determined
Autoignition temperature	Not determined
Decomposition temperature	App. 160 °C
Kinematic viscosity	Not determined
Dynamic viscosity	Not determined
Explosive properties	Not an explosive
Oxidizing properties	Not determined

## Other information

No information available

## **10. STABILITY AND REACTIVITY**

## Reactivity

Stable under recommended storage and handling conditions (see SECTION 7, handling and storage).

#### Chemical stability

This material is stable under normal ambient and anticipated storage and handling conditions.

## Possibility of Hazardous Reactions

None under normal processing

## Conditions to avoid

Strong heating, open flames.

#### Incompatible materials

Oxides of carbon, hydrogen chloride, organic acids, aldehydes and alcohols.

## Hazardous Decomposition Products

Irritating gases may be emitted upon the temperature 160°C.

## **11. TOXICOLOGICAL INFORMATION**

#### Information on likely routes of exposure

Inhalation	Inhalation of vapors in high concentration may cause irritation of respiratory
	system.
Eye contact	Contact with eyes may cause irritation.
Skin Contact	Substance may cause slight skin irritation.
Ingestion	Ingestion may cause irritation to mucous membranes

## Information on toxicological effects
